Shingle Roofing is the most common of all types of residential roofing. It is the perfect choice for many types of

homes with a wide range of roof pitches and shapes. Shinglescomes in various styles and colors.

Depending on the type and shape of the roof, shingles are often used on commercial buildings creating a warmer and more inviting facade. Shingle roofs are also perfect for axuxiliary buildings and sheds.

SLATE ROOFING

Slate Tile Roofing is common is older homes and higher-end construction. They offer a wide variety of colors, sizes, and installation patterns to add distinction and character to your home. Slate roofing is a durable, natural roofing product that has a long life-span if properly maintained.

Options:

- Thickness
- Color
- Size

We use premium slate products directy from the quarry at Virgina Slate. Other products are available.

Eco-Friendly slate-like products are an alternative to natural slate. They are made of a specially-engineered composite material that very closely resembles natural slate while retaining the durability of natural slate.

Metal Roofing is a great alternative to traditional shingle roofing for residential housing and is often used in commercial applications. It offers exceptional durability in all types of weather and adds a distinctive look to any appliation. Metal roofing comes in many colors and there are several different types to choose from.

Options Include:

- Interlocking Aluminum Panels
- Steel roofing
- Standing Seam

Steel Panels

Standing Seam Steel

Standing Seam Aluminum

Standing Seam Copper

Interlocking Aluminum

We offer many different types of flat roofing to accommodate a variety of residential and commercial applications.

Rubber:

EDPM rubber is a durable product that is fully adheared to the roof surface making it a great—solution for industrial spaces in all weather climates. Rubber roofing is virtually maintenance free.

Modified roofing is a torch-down product that is an alternative to rubber roofing. It offers better durabilty for foot-traffic if your roof is used as a living space.

Flintlastic:

Flintlastic is a self-adhearing membrane that is perfect for low slope roofs often found on decks, porches, and garages. It comes in a variey of colors to compliment standard roof shingles. Flintlastic is a good alternative for low slopes in residential situations where the aesthetics or rubber or modified roofing are not ideal.

Service Program:

We have service crews working in different areas on a rotating basis. We repair all types of roofing and have crews out year round weather permitting. If you have a leak, missing shingle, or broken slate, we will fix it. Our service work is performed based on time and material.

Maintenance Program:

When it comes to the home, everyone wants to know that the roof over their head is protecting them from the elements. Our experienced crews will automatically come either in late fall or spring to do an inspection of your roof and perform routine maintenance which includes:

- Cleaning out all gutters, including on garages
- Tightening and re-caulking flashings
- Repairing or replacing slates, tiles or shingles
- Cleaning off flat or shallow pitched roofs.

Roof Inspections:

Welte Roofing offers comprehensive roof inspections. These are especially helpful when buying and selling homes. We provide documentation and pictures to support our findings. The cost of the inspection report is credited back if you choose to have Welte perform service work on your roof as a result of the instpection.

Other Services:

Welte Roffing offers many other services including:

- Gutter & Downspout Installation / Repair
- Soffit & Fascia Installation / Repair
- Modified Roof Coating
- Vinyl Siding
